Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the instant claims are drawn to a process for preparing ketones or aldehydes by way of the Swern oxidation. The closest prior art of record, Omura et al (J. Org. Chem. 1976) and Appendino et al (J. Chem. Soc. Perkin. Trans. I, 1989) teach the Swern oxidation to produce carbonyl compounds. The closest prior art, however, fails to teach or fairly suggest such a reaction conducted in a microreactor as claimed in the present invention. Applicants have shown in their examples and comparative examples that a microreactor affords them higher yields of carbonyl compound and shorter reaction times than typical reactors used for the Swern oxidation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sikarl A. Witherspoon whose telephone number is 571-272-0649. The examiner can normally be reached on M-F 8:30-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yvonne Eyler can be reached on 571-272-0871. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
